

Learn more about BIO Deutschland, a key collaborator for HealthTech For Care to reinforce the European positioning of HealthTech Innovation Days

About Bio Deutschland

BIO Deutschland, short for Biotechnology-Industry-Organisation Deutschland, is Germany's sector association of the biotechnology industry. The association has set itself the objective of supporting and promoting the development of an innovative economic sector based on modern biosciences.

The Berlin-based association currently has over corporate 340 members. It is run by a board of currently nine members consisting of CEOs and managing directors of biotechnology companies and VC firms. This committee comprehensively represents the various fields in the sector. Using a wide range of political initiatives, BIO Deutschland lobbies for improvements to the legal parameters for innovative small and medium-sized enterprises and their multinational partners. Additionally, the association is also very active in a broad range of events with the aim of providing biotechnology with a platform for discussion and interaction.

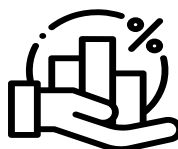

BIO Deutschland member companies and their experts are organised in working groups and networks that deal with the various topics such as entrepreneurship, bioeconomy, health politics or technology transfer.

BIO Deutschland is Germany's biotechnology sector representative at the BDI, the federation of German industries, and at the European association, EuropaBio, in Brussels. BIO Deutschland also works closely with other biotech organisations in Europe and worldwide in order to lobby for the interests of the sector in an internationally coordinated way.

Why did Bio Deutschland decide to collaborate with HealthTech For Care?

International cooperation among stakeholders is extremely important for technology transfer and the market entry of innovative medical products. The Corona crisis, at first making exchange and networking as we knew it more difficult if not impossible, made it especially clear that research and development for our health can only bear fruit through collaboration. BIO Deutschland always puts a strong emphasis on the significance of networking events. We are therefore pleased to join forces with HealthTech For Care to strengthen European exchange and thus bring biotech innovations faster to society.

What are the benefits for Bio Deutschland members to participate in HTID3?

Our members value high-profile events with good networking and partnering opportunities, as biotech companies are always on the lookout for interesting and promising cooperation opportunities. Through our cooperation with HTFC, we can bring in topics and speakers that are important to our members. In addition, the cooperation allows us to offer our members special rates to the event which makes it even more attractive to attend.

Key elements - HealthTech Innovation Days 2020

2 Days live in Paris &
Online on
October 4&5 2021

Hybrid event :
Attend in person or
virtually

Conferences with
experts and KOLs on
trend topics

Visibility from Europe and
France institutionnals

More than 1,000 private
meetings with international
investors and pharmaceutical
groups

Expected participants
above 800 from 19
countries

>150 Selected European
companies : Biotech,
Medtech, Digital Health

15
Pharmaceutical groups
(BD and CVC departments)
& Industrial players

>300
dedicated
international investors
