The Endowment fund: HealthTech For Care

What is HealthTech For Care?

HealthTech For Care is an endowment fund created in 2020 after the success of the first edition of HealthTech Innovation Days. The objective of HTFC is to support and promote access to care for all patients and, more specifically, access for all to new medical technologies and new drugs.

Our mission statements

Fostering

the growth and development of the entire health ecosystem.

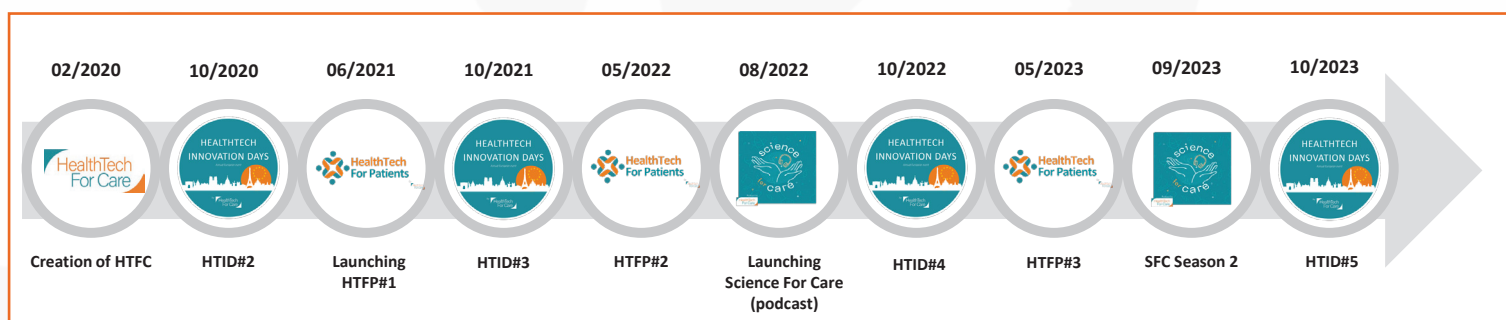

Advocating

for the advancement of innovative therapies and treatments to benefit patients.

Promoting

enhanced access to care for patients within the European healthcare ecosystem.

4th edition: HealthTech For Patients

May 16, 2024

What is HealthTech For Patients?

The creation of HealthTech For Patients (HTFP) serves as a platform for patients to express their needs and discover innovations in healthcare. For the past three years, HealthTech For Care has been hosting HealthTech For Patients events centered around themes dedicated to enhancing patient access to care.

Our mission statements

Creating

a bridge between healthcare professionals and patients through a platform for open exchange to better understand patient perspectives, needs, and experiences.

Describing

patient anticipations and the function of forward-thinking enterprises in the healthcare industry.

Disseminate

to every citizen the ongoing initiatives to expedite innovation for patients.

What does HTFP provide access to?

Conferences: Two round tables with experts on different domains sharing their skills for improving innovations for patients.

Digital event: Dedicated to all citizen who want to learn more about innovation, the point of view of patients, scientific insights...

Worldwide participants: Exchange with key players from the European health ecosystem.

Patient centric: Patients should be placed at the heart of innovation.

Informations about our last editions

More than 380 registered.

Speakers involved in different thematics: Non-Communicable Diseases, Cardiac Diseases...

European Commission participation.

Participants from over 31 countries.

6th edition: HealthTech Innovation Days

September 17 & 18, 2024 in Paris

What is HealthTech Innovation Days?

Every year, HealthTech For Care organizes the HealthTech Innovation Days (HTID), a pivotal European event serving as a platform for innovation and science stakeholders. HTID accelerates the implementation of solutions for patients, placing their role at the heart of innovation. The event fosters dynamic interactions among European companies, global investors, industrial and pharmaceutical groups, as well as patients and patient associations. Moreover, HTID includes conferences addressing crucial topics of general interest, guided by international experts and key opinion leaders (KOLs). Access to these sessions is available to everyone on the HealthTech For Care endowment fund website.

What does HTID provide access to?

Meet experts to support the development of your company and accelerate the deployment of your innovation to patients.

Attend panels led by international experts to learn on key topics.

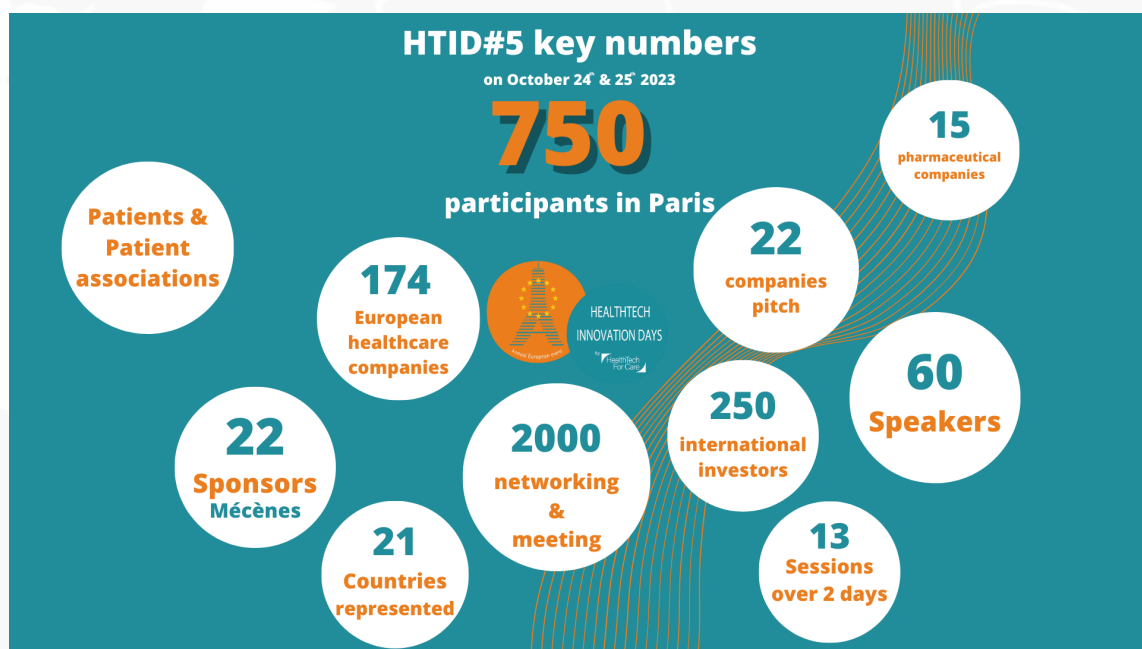

Gather within the European innovative healthcare community.

Participate in pitch sessions of projects putting the patient at the heart of their innovation.

Science For Care & Patient Observatory

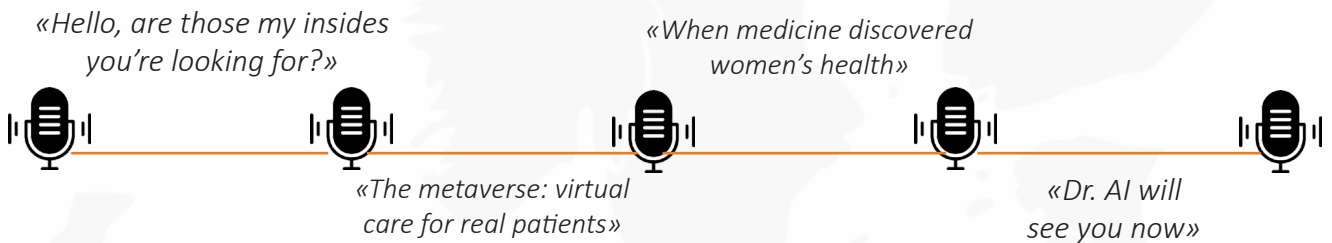

What is Science For Care?

«Science For Care» is a podcast that delves into the narratives behind the scientific and medical breakthroughs that have driven innovation for patients. The inaugural season, produced by HealthTech For Care in collaboration with MedShake Studio, was introduced in 2022.

Its aim is to empower listeners with insights into the narratives behind remarkable scientific and technological advancements, whether they are in the process of development or already in use, all geared towards providing care for everyone.

What is the Patient Observatory?

HealthTech For Care introduces the European Patient Observatory, emphasizing initiatives for equitable healthcare access and innovation in Europe. The observatory, involving patients, public health actors, and industry players, focuses on research organization, digital solutions access, clinical trials, drug registration, pricing, and patient engagement. HTFC aims to be a collaborative platform through this study, sharing best practices, facilitating dialogue, and generating proposals for swift contributions to achieving equitable healthcare access in Europe.

Our mission statements

Understand
European patients' expectations and highlight the differences between European countries.

Bring
knowledgeable information to the EU to support dedicated actions and tools to secure equitable access to solutions for patients across Europe.

Gather
stakeholders from patient associations, patients, regulatory bodies, healthtech companies, to discuss their input to develop faster patient oriented projects.

Get involved!

To implement all actions of public interest, we seek your dedication and support.

Your support for HTFC is a pivotal asset in facilitating our efforts to progress discussions throughout the entire value chain of the healthcare ecosystem in Europe and to deliver innovative solutions to patients.

Together, we have the potential to enhance access to care for all citizens!
