Founding Partner
at Biotech Development Conseil

HTFC TEAM

What is HealthTech For Patients?

HealthTech For Patients (HTFP) was created as a place of expression for patients to present their needs and be introduced to innovation in healthcare.

In this context, HealthTech For Care has been organizing HTFP for the past two years on themes focused on improving patient access to care.

Our missions

Create an exchange between different professionals and patients in order to create a link.

Explain patient expectations and the role of innovative companies in the health sector.

Communicate to all citizens all processes underway to accelerate innovation for patients.

Informations about HTFP#3

Conferences:

Two round tables with experts of different domains sharing their skills for improving innovations for patients

Digital event:

Event dedicated to all citizen who want to learn more about innovation, the point of view of patients, scientific,...

Worldwide participants

Exchange with key players from the European health ecosystem

Patient centric

Patients should be placed at the heart of innovation

Save the Date!
HealthTech For Patients – 3rd edition
May 25, 2023 in Digital

For this 3rd edition, the format remains the same and will host two round tables several international experts, actors of the health ecosystem, on the following themes:

First round table: Non Communicable Diseases: from prevention to treatments

Second round table: Cardiac diseases: For a better care of patients

Registration

Programme

HEALTHTECH INNOVATION DAYS

HealthTech Innovation Days (HTID) AT A GLANCE

HTID®, organized by the HealthTech For Care endowment fund, on October 24th and 25th, 2023, is offering an auspicious place to exchange to innovation and science sector actors, in order to lead solutions faster to their patients and position them in the center of innovation. The 5th edition will take place in Paris, at the HealthTech Space, and also virtually, on October 27th only. HTID® combines meetings between companies, investors, industrial and pharmaceutical companies, and more generally all industry stakeholders, including patients and patient associations. Moreover, conferences on major topics of general interest are hosted by international experts and are accessible to all on HTFC endowment fund website after the event.

What does HTID provide access to?

Meets:

experts to support the developments of your company and accelerate the deployment of your innovation to patients.

Attend:

panels led by international experts to learn on key topics.

Gather:

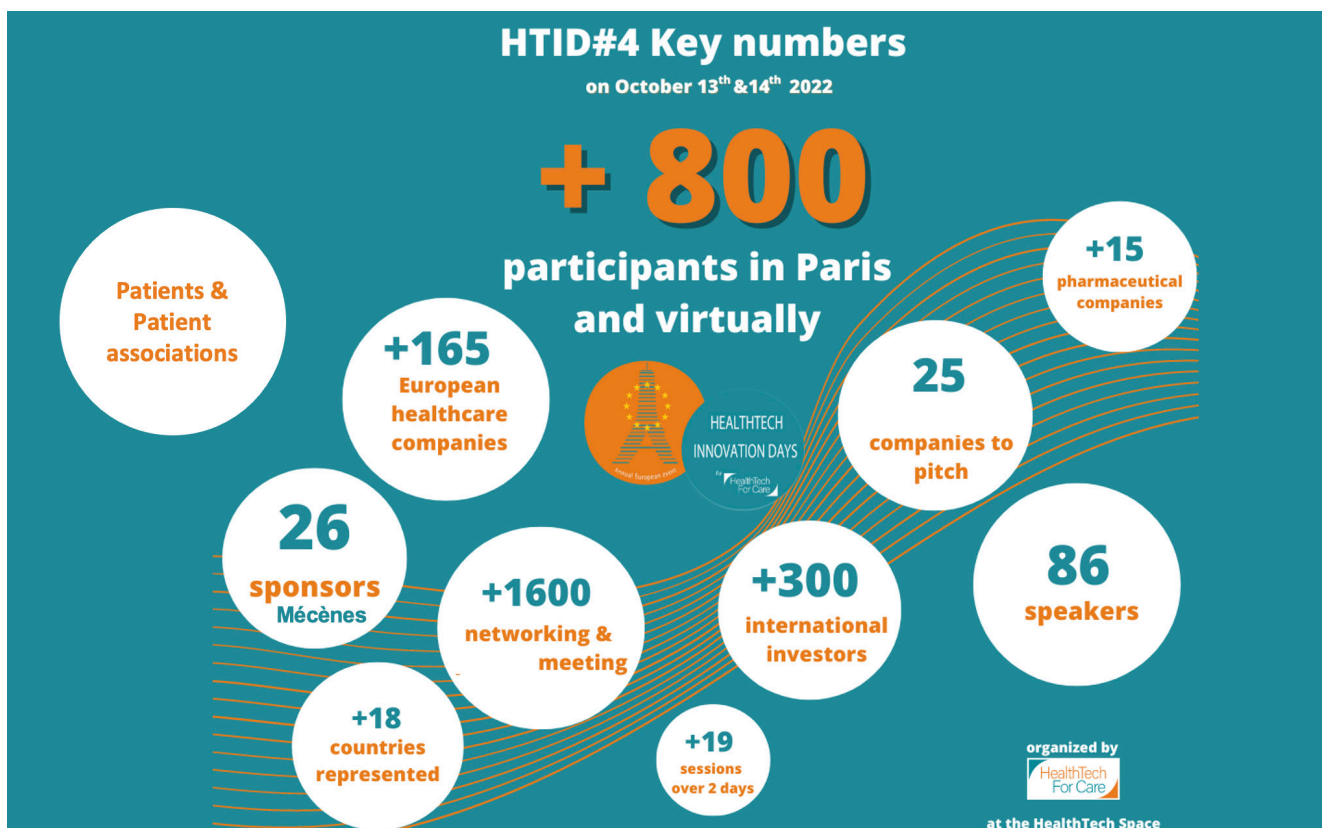

within the European innovative healthcare community.

Participate:

Pitches and poster sessions of projects putting the patient at the heart of their innovation

PODCAST & OBSERVATORY

A podcast unveiling the stories behind the scientific and medical breakthroughs that accelerated innovation for patients.

What is Science For Care?

«Science For Care», a podcast unveiling the stories behind the scientific and medical breakthroughs that accelerated innovation for patients. The first season created by HealthTech For Care, with the support of MedShake Studio, has been launched in 2022.

The podcast gives the floor to the greatest discoverers and entrepreneurs of innovative solutions in healthcare. Its objective is to allow its listeners to learn and understand the stories behind amazing scientific and technological innovations under development or already used to bring care for all.

We will bring you along 8 episodes to understand more on mRNA discovery, women's health, rare diseases, innovation in clinical trials, and more! All these stories and interviews, narrated by Anca Petre alongside scientists, researchers, medical doctors, entrepreneurs, and patients are proof that we must continue to invest in research, no matter how uncertain it seems today. Because tomorrow, it might just change the world!

Listen to all episodes

What is the Patient Observatory?

By promoting these initiatives, the Observatory aims to defend a European policy that promotes cutting-edge medical innovation while ensuring fair access to care for all European patients.

- Understand European patients' expectations and highlight the differences between European countries.
- Bring useful knowledgeable information to the European Commission to support dedicated actions and tools to secure equitable access to solutions for all patient across Europe.
- Bring all stakeholders from patient associations, patients, national clusters, regulatory bodies, innovative healthtech, pharmaceutical companies, ... to discuss their input to develop faster patient-oriented projects.
- Technological innovation must allow Europe to ensure its strategic autonomy in order to guarantee its responsibilities towards its population and to face health risks.
- Equal access to healthcare is a cornerstone of the social contract that binds the people of Europe: regardless of income or location, everyone must benefit from the best existing standards of care. This foundation must be consolidated.

The initiatives presented by the Observatory are detailed, their financing and their KPI are explained. The material produced by the Observatory, in the form of a report, must be used to feed the public debate and to support the arguments of the elected representatives who, at the European level, plead for this double requirement of innovation and equity.

CONTACTS

Get involved!

In order to set up all the actions of general interest, we appeal your commitment and support. Indeed, your support to HTFC is a major asset to set up our actions to advance on discussion through the full value chain of the healthcare ecosystem in Europe and bring innovative solutions to patients. Together we can improve access to care for all citizens!
